Carotid Intima–Media Thickness and Long-Term Exposure to Traffic-Related Air Pollution in Middle-Aged Residents of Taiwan: A Cross-Sectional Study

Ta-Chen Su, Juey-Jen Hwang, Yu-Cheng Shen, and Chang-Chuan Chan

Table of Contents

Table S1. Pearson's correlation between 5 different pollutants (N=689).

Table S2. Models for two pollutants (PM_{2.5} abs and NO₂) as determinants of carotid intima-media thickness (CIMT) after adjusting other cardiovascular covariates.

Table S3. Interaction effects and the subgroups analysis to maximum CIMT at LCCA with PM_{2.5} abs.

Table S4. Interaction effects and the subgroups analysis to maximum CIMT at LCCA with NO₂.
