

Note to readers with disabilities: *EHP* strives to ensure that all journal content is accessible to all readers. However, some figures and Supplemental Material published in *EHP* articles may not conform to [508 standards](#) due to the complexity of the information being presented. If you need assistance accessing journal content, please contact ehp508@niehs.nih.gov. Our staff will work with you to assess and meet your accessibility needs within 3 working days.

Supplemental Material

Residential Exposure to Natural Background Radiation and Risk of Childhood Acute Leukemia in France, 1990 - 2009

Claire Demoury, Fabienne Marquant, Géraldine Ielsch, Stéphanie Goujon, Christophe Debayle, Laure Faure, Astrid Coste, Olivier Laurent, Jérôme Guillevic, Dominique Laurier, Denis Hémon, and Jacqueline Clavel

Table of Contents

Part 1. Exposure metrics

Part 2. Statistical modeling and analysis of observations using a log-linear multiplicative model, estimation of statistical power

Part 3. Testing for the existence of an association between AL and RBM dose using the UNSCEAR 2006 ERR model
