

ERRATUM

NOTE: In Table 6 of the article by Mendiola et al. [Environ Health Perspect 118:1286–1291 (2010)], the upper confidence limit for total motile sperm given as 0.70 should have been 0.07. Thus the correct β (95% confidence interval) values for total motile count are -0.05 (-0.17 to 0.07).

The authors apologize for the error.

This error has been corrected in the PDF version of this article.
