Note to readers with disabilities: EHP strives to ensure that all journal content is accessible to all readers. However, some figures and Supplemental Material published in EHP articles may not conform to 508 standards due to the complexity of the information being presented. If you need assistance accessing journal content, please contact ehp508@niehs.nih.gov. Our staff will work with you to assess and meet your accessibility needs within 3 working days.

Supplemental Material

U-Shaped Association between Plasma Manganese Levels and Type 2 Diabetes

Zhilei Shan, Sijing Chen, Taoping Sun, Cheng Luo, Yanjun Guo, Xuefeng Yu, Wei Yang, Frank B. Hu, and Liegang Liu

Table of Contents

Table S1 Association of the MnSOD Val16Ala polymorphism and T2D.

Table S2 ORs for the association between the MnSOD Val16Ala polymorphism and T2D in subgroups.

Table S3 ORs for the association between T2D and plasma manganese concentrations, according to the MnSOD Val16Ala polymorphism genotypes.
