

Note to Readers: *EHP* strives to ensure that all journal content is accessible to all readers. However, some figures and Supplemental Material published in *EHP* articles may not conform to 508 standards due to the complexity of the information being presented. If you need assistance accessing journal content, please contact ehp508@niehs.nih.gov. Our staff will work with you to assess and meet your accessibility needs within 3 working days.

Supplemental Material

Geographic Variation in the Association between Ambient Fine Particulate Matter (PM_{2.5}) and Term Low Birth Weight in the United States

Yongping Hao, Heather Strosnider, Lina Balluz, and Judith R. Qualters

Table of Contents

Table S1. Adjusted odds ratio of term LBW associated with PM_{2.5} exposure during pregnancy by county poverty level.

Table S2. Odds ratio of term LBW associated with PM_{2.5} exposure during pregnancy in the contiguous US, using model-based PM_{2.5} estimates.

Table S3. Adjusted odds ratio of term LBW associated with PM_{2.5} exposure during pregnancy by census division, using model-based PM_{2.5} estimates.

Table S4. Odds ratio of term LBW associated with PM_{2.5} exposure during pregnancy in the contiguous US, using monitor-based PM_{2.5} estimates.

Table S5. Odds ratio of term LBW associated with PM_{2.5} exposure during pregnancy in the contiguous US by census division, using monitor-based PM_{2.5} estimates.
