**Note to Readers:** *EHP* strives to ensure that all journal content is accessible to all readers. However, some figures and Supplemental Material published in *EHP* articles may not conform to 508 standards due to the complexity of the information being presented. If you need assistance accessing journal content, please contact ehp508@niehs.nih.gov. Our staff will work with you to assess and meet your accessibility needs within 3 working days.

**Supplemental Material**

**Cord Blood Methylmercury and Fetal Growth Outcomes in Baltimore Newborns: Potential Confounding and Effect Modification by Omega-3 Fatty Acids, Selenium, and Sex**

**Table of Contents**

**Table S1:** Spearman correlation coefficients (p-values) for mercury, selenium and n-3 HUFAs, THREE Study, 2004-2005

**Table S2:** Regression coefficient (95% confidence intervals) for MeHg, n-3 HUFAs, selenium, and IHg in various multivariable regression models, N=271, THREE Study, 2004-2005

**Table S3:** Adjusted regression coefficient (95% confidence intervals) for ln(MeHg), among the full cohort as well as stratum-specific estimates, THREE Study, 2004-2005
