Note to readers with disabilities: *EHP* strives to ensure that all journal content is accessible to all readers. However, some figures and Supplemental Material published in *EHP* articles may not conform to 508 standards due to the complexity of the information being presented. If you need assistance accessing journal content, please contact ehp508@niehs.nih.gov. Our staff will work with you to assess and meet your accessibility needs within 3 working days.

**Supplemental Material**

**Air Pollution and Pulmonary Tuberculosis: A Nested Case-Control Study among Members of a Northern California Health Plan**

Geneé S. Smith, Stephen K. Van Den Eeden, Cynthia Garcia, Jun Shan, Roger Baxter, Amy H. Herring, David B. Richardson, Annelies Van Rie, Michael Emch, and Marilie D. Gammon

**Table of Contents**

**Table S1.** Multi-pollutant conditional logistic regression estimated adjusted odds ratios (ORs) and 95% confidence intervals (CIs) for associations of pulmonary tuberculosis and ambient criteria air pollutants concentrations, 24-month averages, among cases and matched controls nested within the 1996-2010 KPNC membership, stratified by smoking status.

**Figure S1.** Available PM$_{2.5}$ pollutant monitors in California

**Figure S2.** Available PM$_{10}$ pollutant monitors in California

**Figure S3.** Available SO$_2$ pollutant monitors in California

**Figure S4.** Available NO$_2$ pollutant monitors in California

**Figure S5.** Available O$_3$ pollutant monitors in California

**Figure S6.** Available CO pollutant monitors in California
