Supplemental Material

Disinfection By-Product Exposures and the Risk of Specific Cardiac Birth Defects

J. Michael Wright, Amanda Evans, John A. Kaufman, Zorimar Rivera-Núñez, and Michael G. Narotsky

Table of Contents

Table S1. Spearman Correlation Coefficients for Disinfection By-Product Metrics
Table S2. Adjusted Odds Ratios (aORs) between Disinfection By-Product (DBP) Exposures and Tetralogy of Fallot Stratified by Sex
Table S3. Adjusted Odds Ratios (aORs) between Disinfection By-Product (DBP) Exposures and Ventricular Septal Defects Stratified by Sex
Table S4. Adjusted Odds Ratios (aORs) between Disinfection By-Product (DBP) Exposures and All Cardiovascular Defects Excluding Patent Ductus Arteriosus
Table S5. Adjusted Odds Ratios (aORs) between Disinfection By-Product (DBP) Exposures and Isolated Ventricular Septal Defect Case
Table S6. Adjusted Odds Ratios (aORs) between Disinfection By-Product (DBP) Exposures and Isolated Tetralogy of Fallot Cases
