8.44 IMPACT FACTOR
According to the 2015 *Journal Citation Reports*®

EHP disseminates new knowledge and fosters discussion about interrelationships between the environment and human health.

- **Original research** captures high-impact scientific advances.
- **Review articles** synthesize large bodies of knowledge.
- **Commentaries** provide new perspectives.
- **Brief Communications** convey information of general public health interest.

There's more to *EHP* than groundbreaking research.

- **News features** explore timely environmental health issues of interest to scientists, policymakers, advocacy groups, health care providers, educators, and the public.
- **Science Selections** explain *EHP* research findings in nontechnical language.
- ***EHP Chinese Edition*** translates selected content for new audiences.
