Supplemental Material

Pesticide Exposure and Risk of Rheumatoid Arthritis among Licensed Male Pesticide Applicators in the Agricultural Health Study

Armando Meyer, Dale P. Sandler, Laura E. Beane Freeman, Jonathan N. Hofmann, and Christine G. Parks

Table of Contents

Figure S1. Identification of cases and controls

Table S1. Exposure-response relationship between intensity-weighted lifetime use of specific pesticides and incident RA among male licensed pesticide applicators in the Agricultural Health Study

Table S2. Ever use of specific pesticides and incident RA among smokers and non-smokers male licensed pesticide applicators in the Agricultural Health Study

Table S3. Ever use of specific pesticides and incident RA among male licensed pesticide applicators in the Agricultural Health Study, according to age

Table S4. Main characteristic of probable and possible RA cases and non-cases among male licensed private applicators in the Agricultural Health Study

Table S5. Ever use of specific pesticides associated with possible and probable incident RA among male licensed pesticide applicators in the Agricultural Health Study
