Supplemental Material

Ambient Coarse Particulate Matter and the Right Ventricle:
The Multi-Ethnic Study of Atherosclerosis

Jennifer D’Souza, Steven Kawut, Laura R. Elkayam, Lianne Sheppard, Peter S. Thorne, David R. Jacobs, Jr, David A. Bluemke, Joao A. Lima, Joel D. Kaufman, Timothy V. Larson, and Sara D. Adar

Table of Contents

Figure S1. Study Population
Table S1. Comparison of Full Cohort with Included and Excluded samples
Table S2. Pearson Correlation Coefficients between different pollutants: overall and within study site
Figure S2. Associations Between Air Pollutant Concentrations and Right Ventricular End-Diastolic Mass in Single and Multi-Pollutant Models (g per IQR of Pollutant, 95% CI)
Figure S3. Sensitivity of Results to Adjustment for Various Covariates Including Potential Intermediates
Figure S4. Effect Modification of Associations Between PM_{10-2.5} Concentrations and Right Ventricular End-Diastolic Volume and Ejection Fraction, After Control for PM_{2.5} and NO_{2} (g per IQR of Pollutant, 95% CI)
