Serum Polybrominated Biphenyls (PBBs) and Polychlorinated Biphenyls (PCBs) and Thyroid Function among Michigan Adults Several Decades after the 1973-1974 PBB Contamination of Livestock Feed

Melanie H. Jacobson, Lyndsey A. Darrow, Dana Boyd Barr, Penelope P. Howards, Robert H. Lyles, Metrecia L. Terrell, Alicia K. Smith, Karen N. Conneely, M. Elizabeth Marder, and Michele Marcus

Table of Contents

Figure S1. Study population flowchart for analysis of thyroid disease and thyroid hormones, Michigan PBB Registry

Figure S2. Directed acyclic graph (DAG) illustrating relationships between serum PBBs/PCBs, thyroid function, and covariates

Figure S3. Directed acyclic graph (DAG) illustrating relationships between PBBs/PCBs, lipids, and thyroid function

Table S1. Serum PCB congener (ng/mL serum and ng/g lipid) concentrations by population characteristics in Michigan adults, 2004-2015 (n=753 individuals, n=801 samples)

Table S2. Serum PBB and PCB concentrations (ng/mL and ng/g lipid) by population characteristics in Michigan adults without thyroid disease 2004-2015 (n=551 individuals, n=571 samples)

Table S3. Adjusted Odds Ratios (aOR) and 95% Confidence Intervals (95% CI) for the association between PBB-153, PCB-118 and ΣPCB (ng/g lipid) and thyroid disease among Michigan females, 2004-2015.

Table S4. Adjusted Odds Ratios (aOR) and 95% Confidence Intervals (95% CI) for the association between PCB-138, PCB-153, and PCB-180 (ng/ml) and thyroid disease among Michigan females, 2004-2015.
Table S5. Adjusted Odds Ratios (aOR) and 95% Confidence Intervals (95% CI) for the association between PCB-138, PCB-153, and PCB-180 (ng/g lipid) and thyroid disease among Michigan females, 2004-2015.

Table S6. Thyroid hormone levels by population characteristics in Michigan adults without thyroid disease, 2004-2015 (n=551 individuals, n=571 samples)

Table S7. β-Coefficients and 95% confidence intervals (95% CI) from regression models for associations of ln-transformed PBB and PCB congeners (ng/g lipid) with thyroid-stimulating hormone (TSH) and other thyroid hormones among Michigan adults without thyroid disease (N=571 samples, 551 individuals), 2004-2015

Table S8. Distribution of thyroid hormones among Michigan women and men without thyroid disease, 2004-2015

Table S9. β-Coefficients and 95% confidence intervals (95% CI) from regression models for associations of PBB-153, PCB-118 and ΣPCB (ng/mL) deciles with TSH and other thyroid hormones among women without a history of thyroid disease (N=343 women, 363 samples)

Table S10. β-Coefficients and 95% confidence intervals (95% CI) from regression models for associations of PBB-153, PCB-118 and ΣPCB (ng/mL) deciles with TSH and other thyroid hormones among men without a history of thyroid disease (N=208)

Table S11. β-Coefficients and 95% confidence intervals (95% CI) from regression models for associations of PCB-138, 153, and 180 (ng/mL) deciles with TSH and other thyroid hormones among women without a history of thyroid disease (N=343 women, 363 samples)

Table S12. β-Coefficients and 95% confidence intervals (95% CI) from regression models for associations of PCB-138, 153, and 180 (ng/mL) deciles with TSH and other thyroid hormones among men without a history of thyroid disease (N=208)
