Association of Low-Moderate Arsenic Exposure and Arsenic Metabolism with Incident Diabetes and Insulin Resistance in the Strong Heart Family Study

Table of Contents

Figure S1. Flow chart of participant’s selection.

Table S1. Participants’ characteristics at baseline by type 2 diabetes status at follow-up.

Figure S2. Median and interquartile range of ΣAs concentrations by participant characteristics.

Figure S3. Median and interquartile range of arsenic metabolism biomarkers by participant characteristics.

Table S2. Hazard ratio (95% confidence interval) of type 2 diabetes incidence by arsenic metabolism biomarkers (N=1774).

Figure S4. Hazard ratio of type 2 diabetes incidence by arsenic metabolism biomarkers (N=1774).

Figure S5. Hazard ratio of type 2 diabetes incidence by inorganic arsenic exposure – interaction analysis (N=1838).

Figure S6. Hazard ratio of type 2 diabetes incidence by arsenic metabolism biomarkers – interaction analysis (N=1774).
