However, some figures and Supplemental Material published in *EHP* articles may not conform to [508 standards](#) due to the complexity of the information being presented. If you need assistance accessing journal content, please contact [ehp508@niehs.nih.gov](mailto:ehp508@niehs.nih.gov). Our staff will work with you to assess and meet your accessibility needs within 3 working days.

## **Supplemental Material**

### **Nitrate from Drinking Water and Diet and Bladder Cancer among Postmenopausal Women in Iowa**

Rena R. Jones, Peter J. Weyer, Curt T. DellaValle, Maki Inoue-Choi, Kristin E. Anderson, Kenneth P. Cantor, Stuart Krasner, Kim Robien, Laura E. Beane Freeman, Debra T. Silverman, and Mary H. Ward

#### **Table of Contents**

**Table S1.** Spearman correlations ( $\rho$ ) between average nitrate (mg/L) and disinfection by-products ( $\mu\text{g/L}$ ) levels among Iowa Women's Health Study participants on public water supplies with >10 years at their drinking water source (N=15,910)

**Table S2.** Number and percent of Iowa Women's Health Study participants in the public water supply analyses for the 10 most populated cities and towns

**Table S3.** Association between drinking water nitrate-nitrogen ( $\text{NO}_3\text{-N}$ ) in public water supplies and bladder cancer risk in the Iowa Women's Health Study among women with >20 years duration at their water source and nitrate exposure based on  $\geq 8$  years of data (N=8,032)

**Table S4.** Association between average drinking water nitrate-nitrogen ( $\text{NO}_3\text{-N}$ ) and bladder cancer by median total trihalomethanes (TTHM) level in the Iowa Women's Health Study (N=15,577)

**Table S5.** Association between private well use (N=4,930) and drinking water nitrate-nitrogen ( $\text{NO}_3\text{-N}$ ) levels in public water supplies (N=15,577) and bladder cancer in the Iowa Women's

Health Study, stratified by vitamin C intake

**Table S6.** Association between dietary nitrate and nitrite and bladder cancer in the Iowa Women's Health Study, stratified by vitamin C intake (N=33,964)

**Table S7.** Association between dietary nitrate and nitrite and bladder cancer in the Iowa Women's Health Study, stratified by smoking status (N=33,964)
